MISSION STATEMENT

Having worked in the industry for over 17 years I bring a unique perspective to assistant directing.

As an ex-producer and production manager I understand how the big picture works , not just the money but also the intricacies of client/ Agency/production company and it's sensitive relationships.

From the stand point of the actual physical production of a film my years as a D.O.P. , key Grip, rigging electrician, etc help me know exactly what makes things go faster and what is going to foul one up in the long haul.

My background in teaching editing and post production is also invaluable in advising production on matters concerning post , where there is through lack of availability or budget no on set post production supervisor.

But all this experience amounts to nothing with out the common sense and logic to apply it to situations, or the stamina & concentration to work out complex situations in short time. The ability to lead, collaborate and above all communicate to crews,actors and production alike are tantamount to success. all of these things lead to a bond of trust, and without trust you can not get a crew and cast to work as a cohesive unit.

My simple goal as an Assistant director is to get cast and crew to work as a highly motivated, **cohesive unit**.
